## Editorial

If we were advertising manager for a rubber-heel concern we would prepare a page on the advantages of having rubber heels on dancing shoes and pumps.

In the first place, they would compel the dancers to stay on their toes, which is the only graceful way to "trip the light fantastic."

Secondly, when some one's heel accidentally comes atop your instep it wouldn't hurt nearly so much as the solid leather ones.

Thirdly—and this is most important—the rubber heel will serve as a marvelous emergency brake when it is necessary to slow up suddenly to prevent skidding into a friend or a part of the wall or something.

And there are other reasons, but these are the most important.
